

# By the Numbers

However you do the math, Whistler adds up to one unforgettable experience

BY SHERI RADFORD

**For 11 minutes,**  
you can enjoy the world's most breathtaking view as the Peak 2 Peak Gondola whisks passengers on a 4.4-km (2.73-mi) ride between the peaks of Whistler and Blackcomb mountains.

Snow bunnies can't resist the  
**1,192 cm (39 ft) of snow**  
that Whistler Blackcomb averages each year.

**With 3,307 hectares**  
(8,171 acres) of ski terrain, Whistler Blackcomb has something for every skier and snowboarder.

**We're number one!**

Whistler Blackcomb is consistently named the best ski resort in North America by publications such as *Skiing Magazine* and *Freeskier*.

Whistler Mountain's ski season runs from Nov. 22, 2012 to Apr. 21, 2013, which equals

**151 days of great skiing.**

Blackcomb Mountain stays open into the summer months, depending on weather conditions.

**Blackcomb's peak elevation of 2,284 m**

(7,494 ft) is a bit taller than Whistler Mountain's 2,182 m (7,160 ft).
