

## Hot Looks

Pool parties, festivals, BBQs—there are plenty of reasons to look good in summer, but no one wants to spend hours slathering on thick make-up that melts in the August heat. Instead, try this **handful of products to look your sun-kissed best**. The oil-free Skin Boost Serum from Skoah uses plant polypeptides to increase collagen production and fade hyperpigmentation, resulting in firmer, clearer, hydrated skin. Essie's summer collection of nail polishes includes eye-catching shades such as florescent fuchsia berry (pictured) and supercharged blue violet. Sheer Moisture Lip Tints from Mineral Fusion use cocoa butter to nourish lips while adding a hint of colour. The Self Tan Bronzing Mousse from St. Tropez creates a streak-free, natural-looking golden hue that lasts up to five days—and doesn't harm skin the way Mother Nature's suntans do. Find the Skin Boost Serum at Skoah (page 38) and the other products at London Drugs (page 32). Who knew summer beauty could be so effortless?—*Sheri Radford*
